1. The Funkwerk Köpenick has built a 5 kW short wave sender (type KN3 land) for the Soviet Zone post office.
2. Development of the sonic depth indicator for ships probably will be completed by the end of March 1954.
3. A sea distress call sender and a sea emergency receiver have been manufactured and delivered to the Warnow shipyard at Warnemünde.
4. A 100 watt medium wave sender and an 800 watt long wave sender have been delivered to the national shipyard at Stralsund.
5. An 0.8 kW medium wave sender for a range of 375 to 600 kHz has been built for the Soviet ship Yury Dolgoruki and has been installed in the ship.
6. A 20 kW medium wave sender is being manufactured for Czechoslovakia. This sender is not for stationary service, but will occupy six van-like motor cars. A 5.2 ton heavy transformer already has been mounted in one of the cars. The equipment probably will be used on the Czech border. A similar sender installation was built last year for the DDR and is now stationed at Burg, near Magdeburg.
